# MAARIF TEACHER TRAINING (MTA)

User and System workflow

تدريب ريادة

RIYADA TRAININGS

# Overview

- MTA is a centralized, role-based platform designed to elevate teaching quality across all Maarif schools.
- It offers structured learning pathways tailored to each educator’s role, subject, and experience.
- Training is delivered through ILT, VILT, and self-paced modules, with certifications based on evidence—not just attendance.
- Real-time dashboards provide visibility to school leaders and HQ on progress, competencies, and readiness.
- A key goal is to build internal training capacity through certified School-Based Trainers and Regional Leads.
- The platform also encourages collaboration via learning communities and a shared resource library.
- Integration with PowerSchool, HRMS, and full Saudi compliance makes MTA scalable and future-ready.

# Core components of MTA

## Empowering every educators

The Maarif teacher training portal's main objective is to empower every educators through structured and role based development

Pre-Training Assessment to map the current knowledge with defined competencies

Create a personalized learning pathway through competency frameworks

AI driven course suggestion and recommendation
Individual performance tracking

Certification after completion of the courses

Mobile first Access and Right to Left (RTL) compliment

## Empowering every educators

The academy will create a network of Internal trainers, minimizing the dependencies on external trainers

Creating an internal certification model to develop the instructional capability within schools

Creating pathways for regional or cluster-level instructional leaders.

Preparing future academic coordinators and school leaders.

# Main Objective

- Performance management of Educators
- Future Leadership Planning of Educators
- Providing strategic way of learning
- Cross-Institutional Knowledge Sharing:
- Integrate with Existing School Systems
- Alignment with Saudi Educational Standards

# Objectives

## 1. Performance management of Educators

- Help school track how well teachers are performing by using training data, feedback, assessments and reports, school can monitor each teacher's strengths and areas for growth, which will help them to identify the training they require to improve further.
- This will ensure teachers are always developing and performing at their best which directly improves the quality of education for students

## 2. Future Leadership Planning of Educators:

- Help to identify teachers with strong potential and prepare them for future leadership roles, like becoming trainers, coordinators, or even school leaders.
- Builds a strong internal talent pipeline, reducing reliance on external hires and ensuring leadership continuity in schools through structured development paths and performance tracking

# Objectives

### 3. Providing Strategic Way of Learning:

- Provide a structured goal-based learning, according to each teacher's current skills and future goals instead of generic training.
- Uses assessments and AI recommendations to design a personalized training journey.
- Which ensures every minute of training is relevant and impactful, helping teachers learn smarter not harder

### 4. Cross-Institutional Knowledge Sharing:

- Schools in different locations can share resources, successful teaching methods, and master trainers with each other.
- This platform encourages collaboration between campuses, it will create a community of educators who learn and grow together, helping raise the teaching standard across all Maarif schools.

# Objectives

## 5. Integrate with Existing School Systems

- Enable interoperability with Student Information System (SIS) (e.g., PowerSchool), HRMS, and appraisal tools.
- Support Single Sign-On (SSO) for easy and secure access.
- Ensure smooth data synchronization across platforms to avoid duplication and improve accuracy.

## 6. Alignment with Saudi Educational Standards

- All training content and teaching practices in the system will be designed to match the official education quality standards set by the Saudi government.

# MAARIF TRAINING ACADEMY (SUPER ADMIN)

## Users (Hierarchical Roles)

- **Regional**
  Leaders who manage multiple schools and ensure training is consistent across campuses.
- **School Admin**
  Each school's admin who assigns courses to teachers, manages training logistics, and monitors progress.
- **Trainer**
  Certified educators who deliver training sessions, mentor peers, and track trainee progress.
- **Trainee**
  Teachers undergoing training based on their role, goals, and school needs.

## Individual Trainee

- Teachers who directly access courses via the central academy — even if not assigned by school admin.

## Learning Pathway (Training Workflow)

- **Courses**
  Structured training modules on various teaching topics.
- **AI Driven Course Suggestions**
  The system recommends training based on the teacher's role, past performance, and school needs.
- **ILT (In-Person Training)**
  Face-to-face training held in school classrooms.
- **VILT (Zoom)**
  Virtual training using Zoom or other video platforms.
- **Self-Paced (Videos)**
  On-demand training that teachers can complete at their own pace.
- **Classroom Allocation / Zoom Integration / Learn through Videos**
  These manage the actual delivery of the course based on the mode selected.

## Assessment and Certification

- **Pre-Training Assessment**
  A quiz or evaluation to understand what the teacher already knows.
- **Scheduled Training Process**
  The formal period where the teacher attends the course sessions.
- **Post-Training Assessment**
  A test or assignment to evaluate what the teacher learned.
- **Completion & Certification**
  If training is successful, the teacher receives a certificate of completion.
- **Upload Attendance & Feedback**
  Trainers record who attended and gather feedback to improve future sessions.

## Community & Collaboration

- **Cross-Schools Resource Sharing**
  Teachers and schools can share successful strategies, lesson plans, or materials.
- **Support Accessibility**
  Tools and content are designed to be inclusive (e.g., available in Arabic and English, mobile-friendly).
- **Libraries for Lesson Plans, Tools & Templates**
  A searchable collection of shared resources created by teachers and trainers.

## External Integrations & Compliance

- **Student Information Systems (SIS)**
  Pulls in teacher data (subjects, grade levels) from systems like PowerSchool so course assignments match real roles.
- **HRMS & Appraisal Tools**
  Syncs training records with staff performance evaluations and career planning.
- **Assessment & Feedback Engines**
  Allows integration with quiz tools, 360° feedback forms, and classroom observation systems.
- **Single Sign-On (SSO)**
  Teachers log in once to access all systems securely — no need to remember multiple passwords.

### MTA Return on Investment (ROI)

The MTA training Courses delivers strong ROI by improving teacher Performance ,reducing reliance on external trainers and role specification learning because of which its builds sustainable internal leadership pipeline,lower recruitment and training costs.This makes professional development effictive and cost-efficient also .

# Users and Role Identification

## Super Admin (Maarif HQ)

The Super Admin (Maarif HQ) oversees the entire platform, managing courses, users, institutions, and performance analytics across all schools.

## Regional/Cluster Co-Ordinator

The Regional Coordinator (Cluster Instructional Lead) manages multiple institutions within a region, coordinating training delivery and analyzing school-wise performance data.

## Institutional Admin(School)

The Institutional Admin is responsible for managing training activities within their individual school. This includes assigning courses to educators, coordinating ILT/VILT logistics, and monitoring training performance at the school level.

## Trainers

Trainer is responsible for delivering effective training, supporting trainees throughout their learning journey, and actively contributing to content creation and the trainer community.

## Trainee

Trainees (teachers) engage in structured training aligned with their professional goals, completing assessments, tracking their growth, and earning certifications through personalized learning pathways.

# Maarif Teacher Training Academy

## Users

### Regional

- Manage multiple Institution across the region
- Analyze the aggregate view of multiple school
- Track Trainer and Trainee's activity across the region
- track performance variance between schools
- responsible for overseeing training quality and scheduling coordination.

### School

- Assign courses to trainees
- Access teacher's performance data
- Manage classroom locations
- Generate the reports based on performance
- Customize or assign key modules based on school priorities.

### Trainer

- Manage courses
- Deliver training to peers
- Guide teacher & solve their doubts
- Provide teaching material
- Track each individual's performance

### Trainee

- Pre Training Assessment
- Training
- Track performance
- Post-Training Assessment
- Certificate

# SUPER ADMIN (MAARIF HQ)

- The Super Admin will have full control over the platform and will be responsible for end-to-end management across institutions.

**Responsibilities**

- Course Management
  - Create and manage all courses (ILT and VILT formats).
  - Assign courses to specific institutions or individual trainers.
- Assignment & Distribution
  - Distribute training via e-commerce orders or manual assignment.
  - Allocate learning pathways based on institutional or trainer needs.
- Reporting & Analytics
  - Access comprehensive reports for each institution, trainer, and trainee.
  - Monitor and download ROI and quarterly performance reports.
  - Analyze engagement, certification, attendance, and progress metrics.
- Administrative Controls
  - Full user management – add, update, suspend or remove users.
  - Manage institutions – onboarding, structure setup, and linkage.
  - Control platform-wide settings, permissions, and configurations.

# REGIONAL CO-ORDINATOR

- The Regional Coordinator is responsible for managing and supporting multiple institutions within a specific cluster or region. This role ensures consistent training quality, oversees cross-campus coordination, and provides regional insights for strategic improvement.

**Responsibilities**

- Institution Oversight

  Manage multiple schools within the assigned region or cluster.

  Ensure alignment of training delivery with Maarif's academic standards.

- Training Coordination

  Coordinate and schedule VILT sessions and cross-campus ILTs.

  Assign trainers and monitor training calendars across institutions.

- Performance Monitoring

  Access aggregate dashboards of all schools within the region.

  Track school-wise performance variance and identify training gaps.

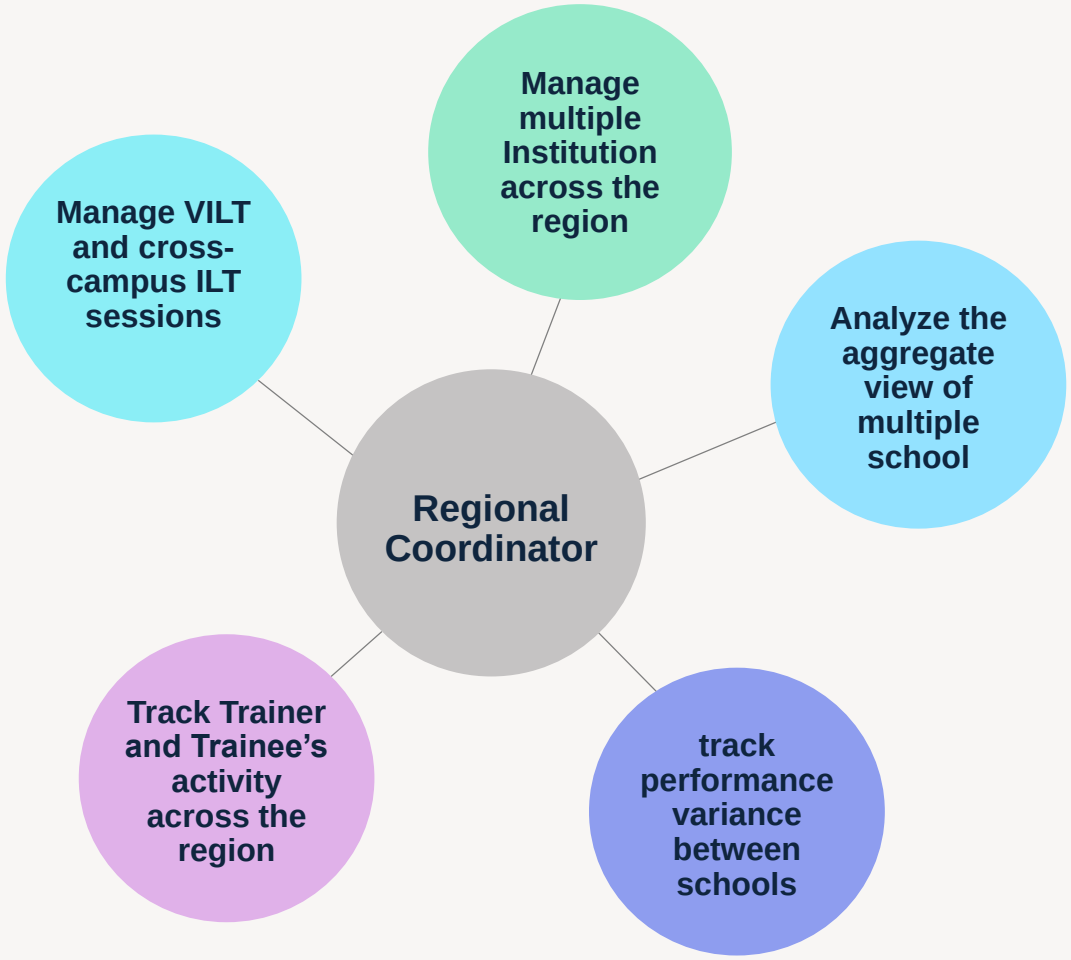
  Generate insights to support strategic planning and leadership decisions.

- Support & Quality Assurance

  Provide guidance to school-based trainers and instructional leads.

  Ensure consistent delivery quality and trainer readiness across campuses.

  Monitor trainer feedback, session ratings, and certification progress.



Manage multiple Institution across the region
Manage VILT and cross-campus ILT sessions
Analyze the aggregate view of multiple school
Regional Coordinator
Track Trainer and Trainee's activity across the region
track performance variance between schools

# INSTITUTIONAL ADMIN(SCHOOL ADMINISTRATOR)

- The Institutional Admin is responsible for managing training activities within their individual school. This includes assigning courses to educators, coordinating ILT/VILT logistics, and monitoring training performance at the school level.

**Responsibilities**

- **Course Assignment & Management**

  Assign courses and learning pathways to teachers (trainees) within the school.

  Monitor enrollment, progress, and completion status of assigned modules.

- **ILT/VILT Coordination**

  Manage the availability of classrooms for in-person ILT sessions.

  Coordinate trainer availability for both ILT and VILT sessions.

- **Performance Tracking**

  Access detailed **training data and performance reports** of trainees.

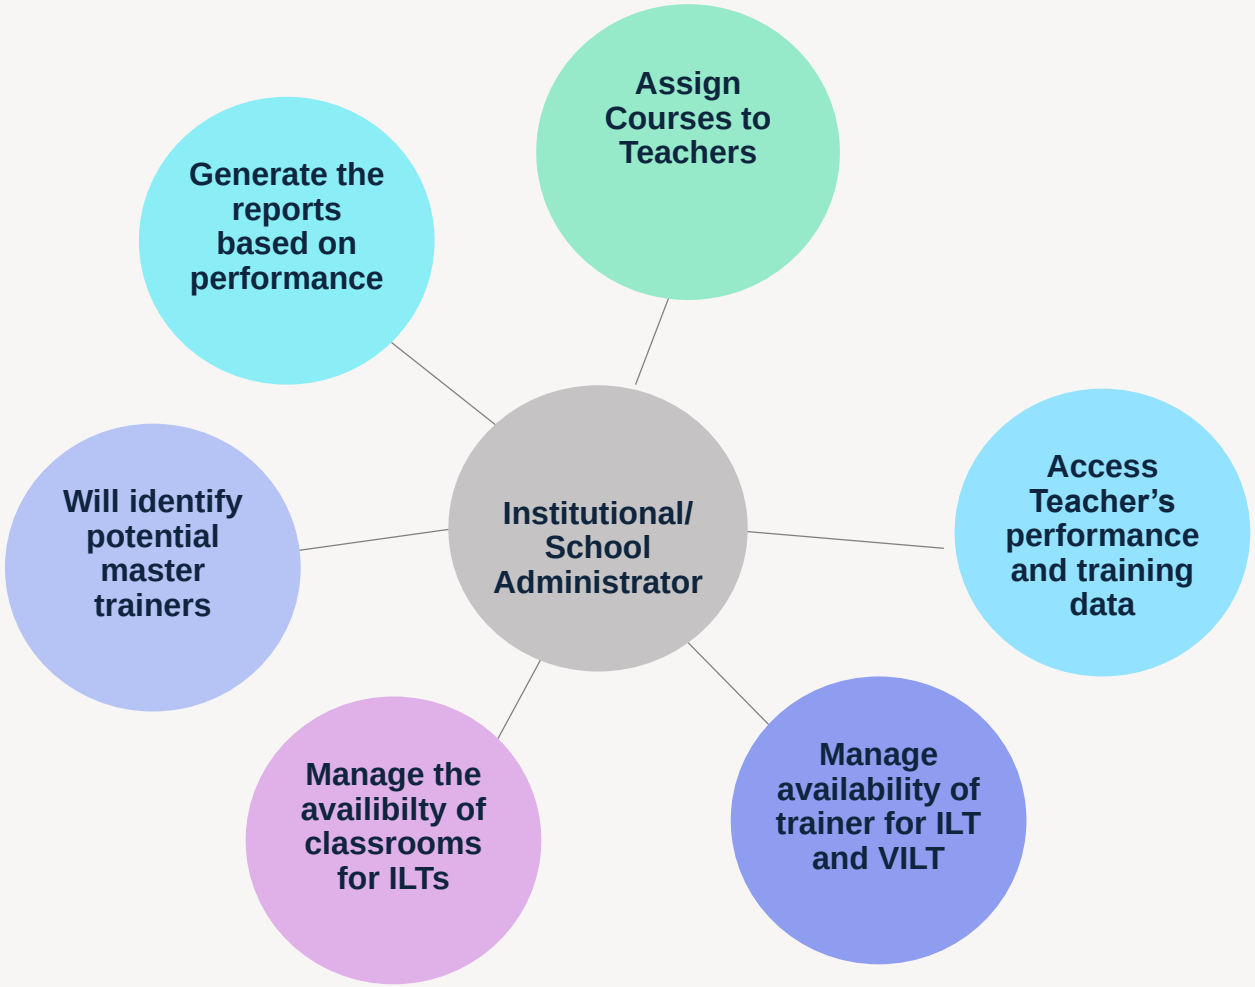
  Analyze participation, assessment results, and certification progress.

- **Trainer Identification & Support**

  Identify potential trainers based on performance and engagement.

  Support the nomination and onboarding of School-Based Trainers.

  Collaborate with regional leads for capacity-building initiatives.



Assign Courses to Teachers
Generate the reports based on performance
Institutional/ School Administrator
Will identify potential master trainers
Access Teacher's performance and training data
Manage the availibilty of classrooms for ILTs
Manage availability of trainer for ILT and VILT

# TRAINERS (THE TRAINER CAN ALSO BE A TRAINEE):

- The Trainer is responsible for delivering effective training, supporting trainees throughout their learning journey, and actively contributing to content creation and the trainer community.

Responsibilities

- Training Delivery & Support

  Deliver ILT/VILT sessions to trainees as per assigned courses.

- Guide and support trainees individually throughout their training process.

  Address trainee queries and provide personalized mentorship.

- Content & Assessment

  Create and update course content aligned with institutional goals.

  Develop pre-training assessments to evaluate baseline knowledge.

- Conduct post-course assessments to measure learning growth and understanding.

  Progress Monitoring & Feedback

  Track the individual progress of trainees through the learning modules.

  Provide constructive feedback to help improve performance.

Scheduling & Session Management

  Manage their calendar and availability for upcoming training sessions.

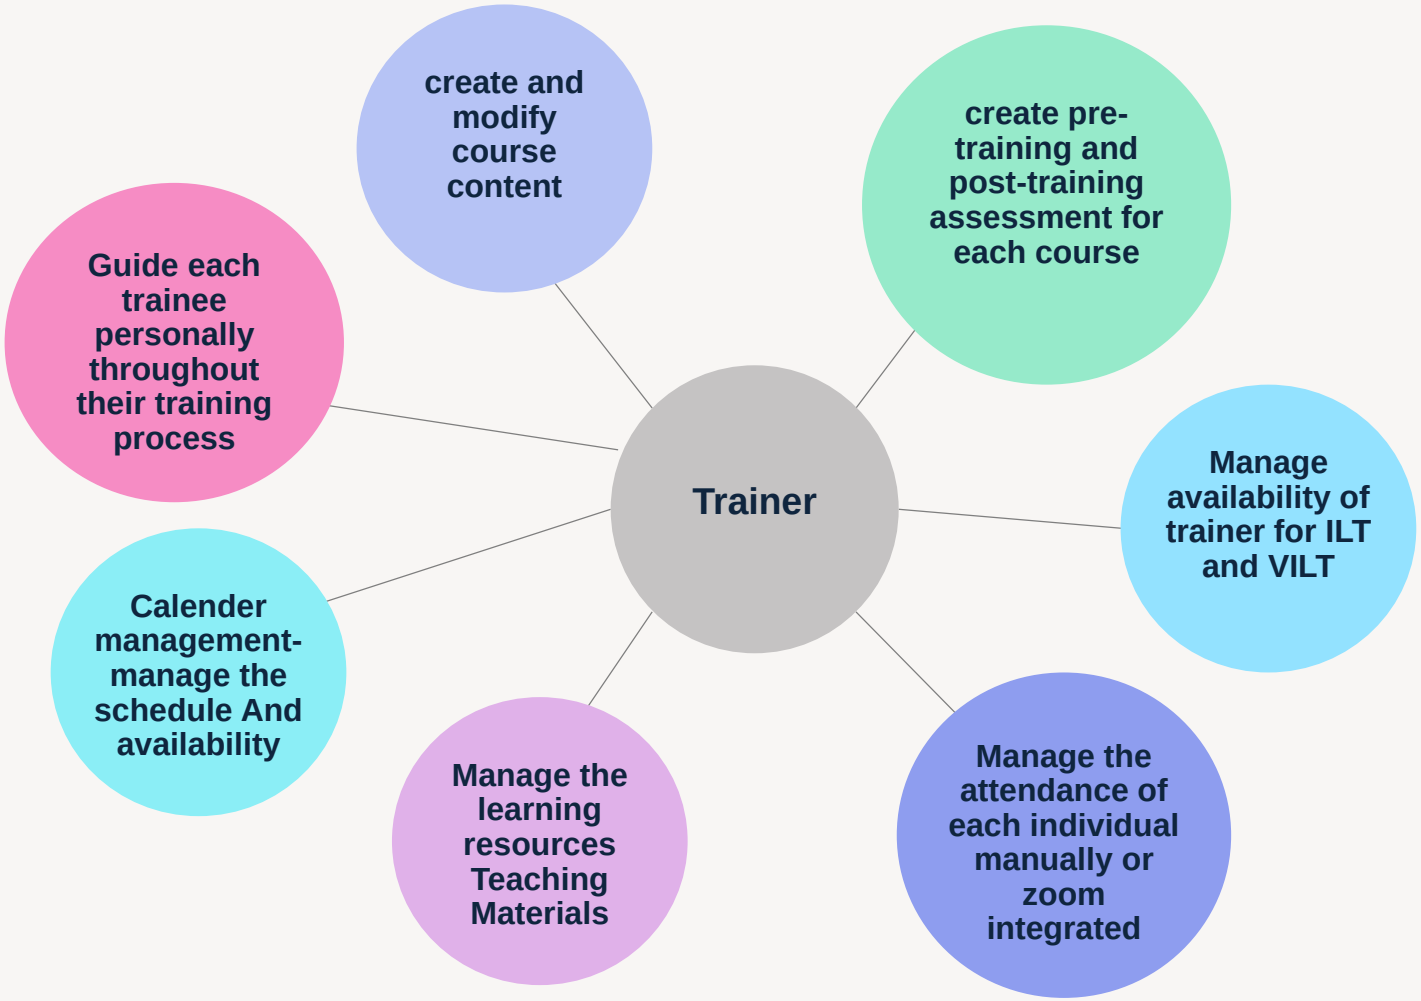
  Create new sessions and notify trainees in advance.

- Resource & Community Engagement

  Manage and update teaching materials and learning resources.

  Participate in the Train-the-Trainer programs for skill enhancement.

  Stay active in the trainer community to share best practices and collaborate.



Trainer
create and modify course content
create pre-training and post-training assessment for each course
Guide each trainee personally throughout their training process
Manage availability of trainer for ILT and VILT
Calender management- manage the schedule And availability
Manage the learning resources Teaching Materials
Manage the attendance of each individual manually or zoom integrated

# TRAINEE (TEACHERS)

- Trainees (teachers) engage in structured training aligned with their professional goals, completing assessments, tracking their growth, and earning certifications through personalized learning pathways.

**Responsibilities**

- Enrollment & Pathway Activation

  Get enrolled in training programs based on individual goals (e.g., promotion, skill improvement, or onboarding as a new joiner).

  Complete a pre-training assessment to measure growth upon completion.

  Receive a personalized AI-driven learning pathway based on assessment results and training data.

- Course Participation

  Enroll in assigned courses (via Institutional Admin assignment or request-based enrollment with approval).

  Participate in ILT/VILT/self-paced modules as per the pathway.

- Certification & Achievement

  Earn certificates after completing courses, assignments, and scoring above the defined thresholds.

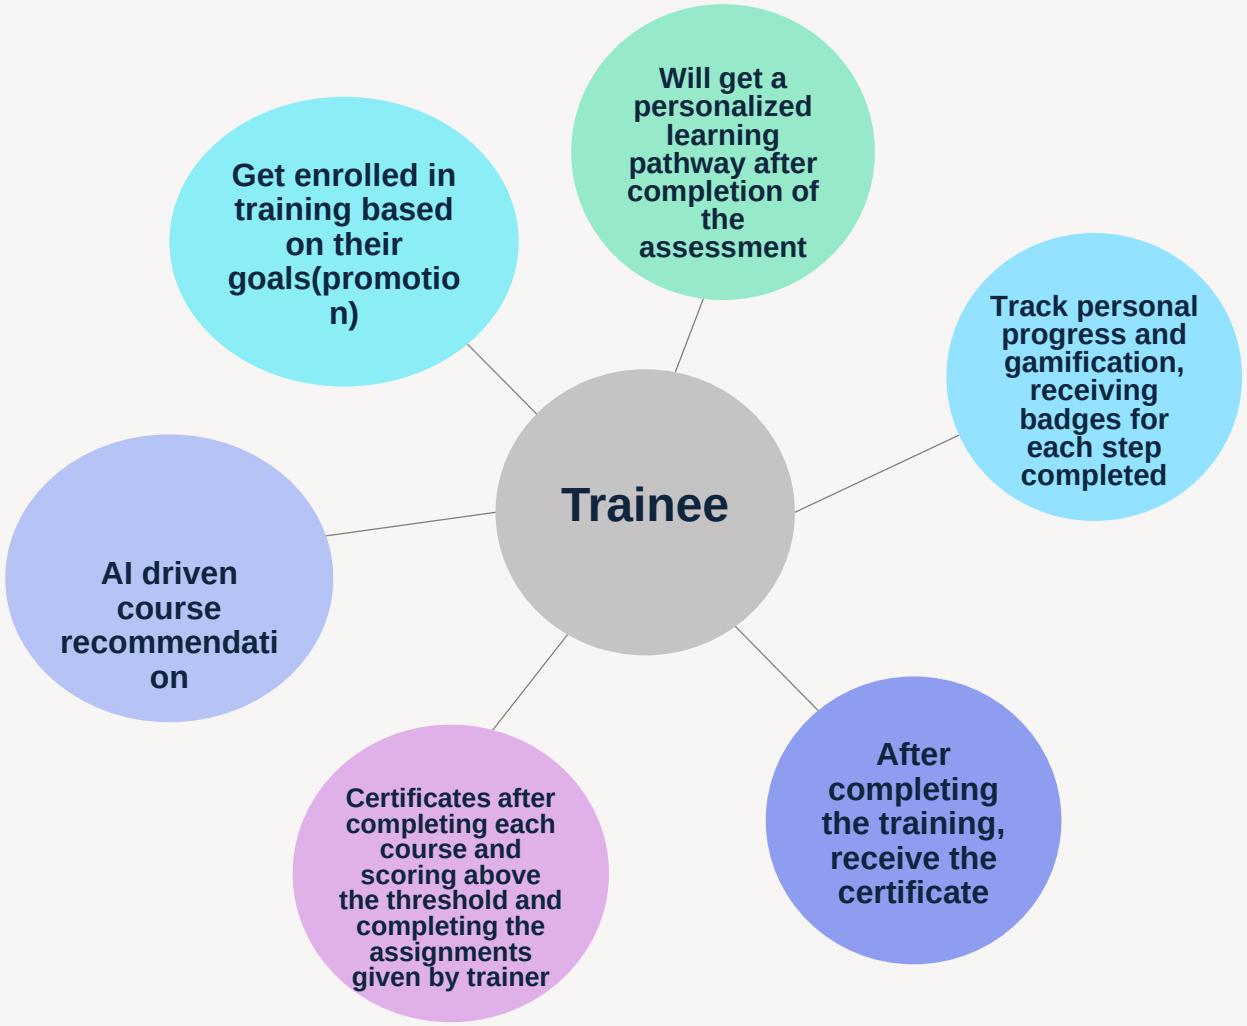
  Track personal progress, collect gamification rewards and badges for milestones achieved.

  Receive final certification upon successful training completion.

- Feedback & Engagement

  Provide session-wise feedback on the training experience and trainer effectiveness.

  Engage actively with training content and stay aligned with the development goals.



Trainee
Get enrolled in training based on their goals(promotion)
Will get a personalized learning pathway after completion of the assessment
Track personal progress and gamification, receiving badges for each step completed
AI driven course recommendation
Certificates after completing each course and scoring above the threshold and completing the assignments given by trainer
After completing the training, receive the certificate

# Summary of MTA Courses

The Maarif Training Academy offers a structured set of professional development courses tailored to educators' roles, experience, and growth paths. These courses are designed to improve teaching quality, develop future academic leaders, and ensure institutional alignment with Saudi education standards.

Courses are delivered through three flexible modes:

ILT (Instructor-Led Training) Courses
•Goal: Face-to-face learning with direct trainer guidance and peer interaction.
•What it covers: Typically foundational or hands-on subjects like teaching strategies, behavior management, early years instruction.
•Why it matters: Builds a human connection and allows for collaborative learning.

VILT (Virtual Instructor-Led Training) Courses
•Goal: Deliver live training sessions via Zoom/Teams to teachers in different campuses.
•What it covers: Same as ILT but remotely — often includes shared digital resources, polls, breakout activities.
•Why it matters: Increases access without logistical barriers; supports multi-campus training delivery.

Self-Paced Learning Modules
•Goal: Allow teachers to learn on their own time with recorded videos, documents, and quizzes.
•What it covers: Digital tools, inclusive teaching, assessment literacy, and refresher content.
•Why it matters: Supports flexibility and ongoing professional development at the teacher's own pace.
